CYBERLEARNING

Microsoft in Education Global Training Partner

Microsoft

CyberLearning, a long-standing **Microsoft Global Training and Training Services Partner**, delivers high-impact bootcamps and Official Microsoft certifications in **AI, Data, Security, and Azure fundamentals**.

Our programs are built around measurable outcomes. Students complete structured bootcamps, receive focused preparation for Microsoft certification exams, and earn globally recognized credentials in AI, Data, Security, and Azure.

These certifications provide tangible proof of skills valued by employers, strengthen placement readiness, and enable institutions to demonstrate industry-validated digital skills training aligned with India's rapidly growing technology sector.

2 Day Trainings

- Cloud Administration Fundamentals
- AI Fundamentals and No Code Agent Development
- Prompt Engineering and No Code Chatbot Development
- Data Science Fundamentals
- Security and Compliance Fundamentals
- Customized AI and Security Trainings

Cloud Administration Fundamentals

- Fundamental Cloud Concepts (e.g. Shared responsibility, service types)
- Architecture Types and Services
- Cloud Management and Governance
- Managing Cloud Access and Security

AI Fundamentals and No Code Agent Development

- AI Workloads and Considerations
- Fundamental Machine Learning Concepts
- Computer Vision Workloads
- Natural Language Processing (NLP) Workloads
- Knowledge Mining and Document Intelligence Workloads
- Principles of Responsible and Secure AI
- Generative AI Workloads
- No-Code Tools Introduction
- Agent Functionality & Deployment

Prompt Engineering and No Code Chatbot Development

01

AI Fundamentals

02

Large Language Model

03

Key Elements of Successful Prompts

04

Core Prompting Techniques

05

Advanced Prompting Tactics

06

Maintaining Data Security with LLMs

07

Chatbot Design & Strategy

08

No-Code Chatbot Development

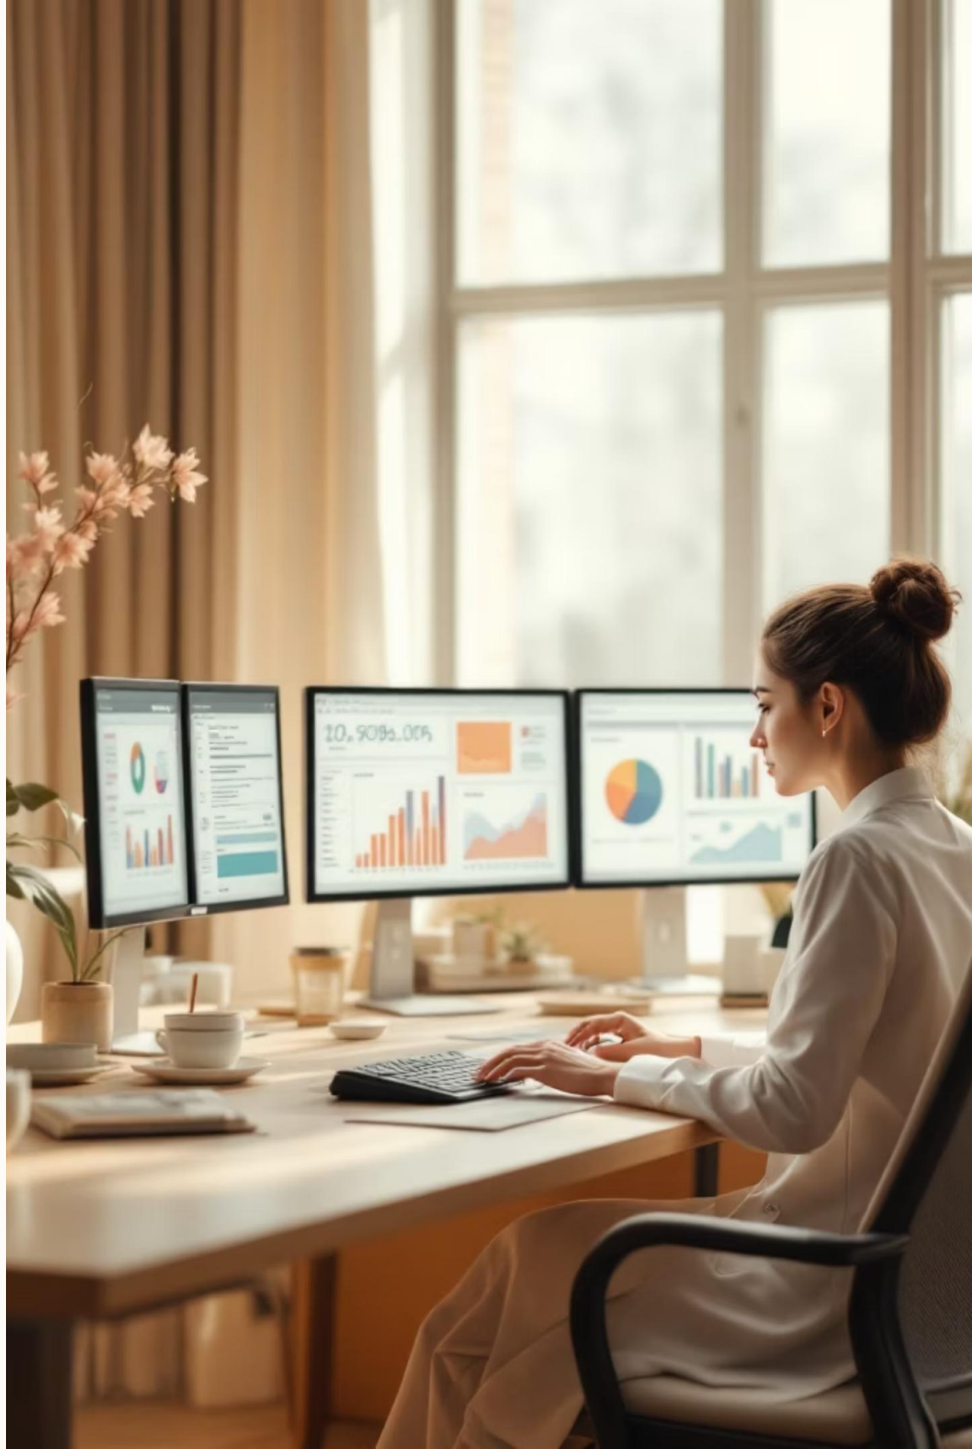
Data Science Fundamentals

Core Concepts

- Core Data Concepts
- Considerations for Relational Data
- Considerations for Working with Non-Relational Data
- Analytics Workloads on the Cloud

Advanced Topics

- Working with Documents, Collections and Fields for NoSQL Databases
- Writing Queries, Views and Stored Procedures with SQL
- No/Low code Data Science Workload Development and Deployment



Security and Compliance Fundamentals

Concepts of Security, Compliance, and Identity

Identity and Access Management

Cloud Secure AI/Application Development Life Cycle Principles

Cloud Network and Endpoint Security Solutions

Utilizing In-built Cloud Compliance Solutions

No/Low code Cloud Security Operations Workload Development and Deployment

Customized AI and Security Trainings

Security Trainings:

- Research Threat Reports and Develop Custom Threat Models
- Study Latest and Relevant Tactics, Techniques and Procedures
- Develop cybersecurity policy for needed scope and train client staff for same

AI Trainings:

- Creating Client Workflows and Technical Solution Architecture
- Develop policies and plans to integrate AI at least possible costing and technical skill requirement
- Train client staff in hands-on usage for all AI solutions integrated, considering security concerns

Some of Our Satisfied Clients:

- University Grants Commission of India
- Microsoft India Pvt. Ltd.
- West Bengal Technical University
- Government of Madhya Pradesh
- University of Delhi (Delhi University)
- SRM University (Sri Ramaswamy Memorial)

And many more...
